

EduERP: Complete System Flow

Admin, Teacher, Student aur Accountant ke liye practical operating guide

Short answer: Sabse pehle **Admin login** hota hai. Uske baad **Teachers** aur **Classes/Sections** banaye jaate hain. Teacher ko class se assign karke phir **Students** create/admit kiye jaate hain. Student ke baad fees, timetable, attendance, examinations aur baaki services configure hoti hain.

1. Initial Setup Order — System shuru kaise karein

Admin Login → Teachers create → Classes/Sections create + Teacher assign → Students create → Fees setup → Timetable → Academic/Service modules → Daily operations

- Admin login:** Admin ke paas pura configuration aur master-data control hota hai.
- Teachers create karein:** Name, email, password, phone, profile details aur subject/class-related information add karein. Teacher ko baad mein class assign hoga.
- Classes create karein:** Jaise Class 10, Section A. Is step mein class teacher select/assign karein. Ek hi class/section ko duplicate na banayein.
- Students add karein:** Student ka name, login email/password, roll number, class, section, guardian contact, Aadhaar number/image aur address add karein. Address mein ab letters bhi enter honge.
- Fee structure aur student fees:** Fees screen mein class/student ke dues, concessions, payments aur receipts manage karein.
- Timetable:** Class, teacher, subject, day aur period-wise timetable set karein. Teacher/student dashboards isi mapping se timetable dikhate hain.
- Academic setup:** Exam schedule, question papers, results workflow, holidays, notices aur documents configure karein.
- Operational services:** Transport vehicles/routes/student allocation, hostel/rooms/allocation, library books/issues, payroll aur finance data setup karein.

Important dependency: Student create karne se pehle selected class/section available honi chahiye. Teacher create pehle karna recommended hai, taki class create karte waqt class teacher assign ho sake.

2. Admin ka complete kaam

Area	Admin kya karta hai
Dashboard	Students, teachers, classes, fee/attendance aur system overview dekhta hai.
Students	Create, update, photo/Aadhaar upload, documents upload, class mapping aur delete/manage karta hai.
Teachers	Teacher login/profile create, update, basic salary/profile image/Aadhaar aur class assignment manage karta hai.
Classes	Class + section banata hai aur class teacher assign karta hai.

Academics	Timetable, examinations, results publishing, admit cards, notices, holidays aur attendance reports manage karta hai.
Finance	Fees, college finance transactions, payroll runs aur accounts users manage karta hai.
Services	Transport, hostel, library, student documents aur smart-attendance sessions/devices manage karta hai.

3. Teacher ka complete flow

1. Teacher apne email/password se login karta hai.
2. Dashboard par assigned class, students, schedule aur relevant totals dekhta hai.
3. **My Class:** Sirf assigned/mapped class ke students dekh sakta hai.
4. **Lectures/Timetable:** Apne periods aur class timetable dekhta hai.
5. **Attendance:** QR attendance session ya normal attendance ke through class attendance mark karta hai.
6. **Homework/Assignments:** Class ke liye homework create karta hai; student portal par wahi homework visible hota hai.
7. **Results:** Assigned exam mein marks enter karta hai aur submit karta hai. Admin review/publish ke baad student ko result dikhai deta hai.
8. **Notices & admit cards:** Notices dekh sakta hai aur admit-card information access karta hai.

4. Student ka complete flow

1. Admin student record create karta hai; wahi email/password student login ke liye use hota hai.
2. Student dashboard par personal profile, attendance, fee aur academic summary dekhta hai.
3. **Timetable:** Assigned class/section ka schedule dekhta hai.
4. **Homework:** Teacher ka posted homework dekhta hai.
5. **Attendance:** QR attendance use kar sakta hai aur apni attendance records dekh sakta hai.
6. **Results/Exams:** Published results, examinations aur available admit-card status dekhta hai.
7. **Fees:** Fee due/payment status aur related information dekhta hai.
8. **Services:** Library issue history, teachers, notices, transport/hostel related campus services aur personal documents access karta hai.

5. Accountant ka complete flow

Accountant ka role finance-focused hai. Isko student/teacher master records aur document management ka access nahi diya gaya hai.

Allowed	Not allowed
Accounts dashboard, fees, finance transactions, payroll information	Students create/edit/delete, teachers/classes management, student documents
Fee stats, class-wise fee work, finance dashboard, payroll runs	Admin-only destructive management actions

Finance mein income/expense transactions manage hote hain. Fees mein student payments/status track hote hain. Payroll mein staff salary records aur payment runs handle hote hain. Important finance actions audit log mein record hote hain.

6. Daily end-to-end example

1. Admin morning mein new admissions add karta hai aur unhe existing class/section se map karta hai.
2. Teacher apna timetable dekhta hai, class leta hai aur attendance/homework update karta hai.
3. Student login karke homework, timetable, attendance aur notices check karta hai.
4. Accountant received fee payment ko system mein record karta hai; fee status update hota hai.
5. Exam period mein Admin exam schedule banata hai; Teacher marks fill/submit karta hai; Admin approve/release/publish karta hai; Student published result dekhta hai.
6. Month-end par Accountant/Admin finance aur payroll reconcile karta hai.

7. Module-wise data flow

Module	Data ka source	Kaun use karta hai
Class & Teacher mapping	Admin creates class + assigns teacher	Teacher class list, student timetable/teacher list
Student admission	Admin student record + class mapping	Student login, fees, attendance, results, services
Attendance	Teacher/Admin marks or QR session	Admin reports, student dashboard
Homework	Teacher creates for mapped class	Student homework list
Results	Admin exam + teacher marks + admin publish	Student results/marksheet
Fees	Admin/Accounts manages fee data and payments	Admin/Accounts reports, student fee page
Campus services	Admin configures hostel, transport, library	Student campus-services/profile views

8. Best-practice checklist

- Class/section aur teacher mapping student admissions se pehle complete karein.
- Har user ke liye unique email use karein.
- Phone: exactly 10 digits; Aadhaar: exactly 12 digits; PIN code: exactly 6 digits.
- Result publish karne se pehle marks, fee-clearance policy aur class mapping verify karein.
- Students/teachers ko delete karne se pehle linked academic/financial records review karein.
- Accountant ko sirf finance role mein rakhein; admin credentials share na karein.
